About

I am a full-stack (MERN) developer. I have experience working with various programming languages and Frameworks. I am comfortable working with both front-end and back-end technologies. I am passionate about creating efficient and user-friendly applications.

Skills

Expertise: HTML, CSS, JavaScript, React JS, Next JS, Redux, Redux Toolkit

Comfortable: Tailwind-CSS, GSAP, Node JS, Express JS, Mongo DB, REST API.

Familiar: Razorpay, Github, Netlify, Postman, Mailtrap.io.

Personal Projects

Modazen: Engineered a secure MERN stack e-commerce platform with features like Google OAuth login, Razorpay payments, Twilio OTP, and dynamic product filtering.

TP-Coin: Developed a MERN-based cryptocurrency exchange with secure transactions, portfolio tracking, real-time trading, and integrated payment/authentication features.

Music School Website: Built a user-friendly information site with Next.js and Aceternity UI, featuring sleek design and intuitive navigation.

Experience

I have almost 1 year of experience working as a full-stack developer at Filament AI. In this role, I have been responsible for the development of web from front-end to back-end, including coding and testing. I have also worked with various programming languages and frameworks.
