

FAIZ MOHAMMAD

Full Stack Web Developer | Google Apps Script Engineer | Automation Specialist

+91 7408751873 · faiz.mohammad.dev@gmail.com · Lucknow, India · [LinkedIn](#) · [GitHub](#) · [Portfolio](#)

SUMMARY

Google Apps Script Engineer and Full-Stack Web Developer with hands-on experience automating high-volume financial workflows and shipping production-grade Web Apps. Reduced manual processing time from hours to minutes. Contributor to 2 live Google Workspace Marketplace add-ons. Specialized in React.js, Node.js, and Google Workspace API integrations. I work at the intersection of frontend interfaces and backend automation, which means I build things that look good and actually cut your team's manual work down to almost nothing.

EXPERIENCE

Automation Developer — [Farida Gupta](#)

Full-Time • July 2026 - Present

- Built Google Apps Script workflows automating Sales, Operations, and Finance processes across departments.
- Developed Sheets dashboards and automated Gmail/Forms/Drive approval and notification workflows.
- Integrated Workspace with ERP/CRM systems via REST APIs for real-time MIS dashboard reporting.

Web Developer — [CloudFort Technologies](#)

Full-Time • July 2024 – June 2026

- Architected Full-Stack Web Apps in React.js + Tailwind CSS focused on responsive UI and performance.
- Integrated Google Workspace APIs into internal portals for real-time Sheets-to-Web Data flow.
- Engineered E-commerce features and Utility tools; deployed via Git, GitHub, and Netlify.

Google Apps Script Developer — [PeakEaze \(EazyCapture\)](#)

Part-Time • Jan 2026 – April 2026

- Automated Financial workflows across Sheets, Drive, Gmail & Forms — eliminating hours of manual data entry.
- Built custom reporting engines and dashboards for large-dataset processing and automated ledger creation.
- Implemented advanced triggers and batch-processing logic, boosting script runtime accuracy and throughput.

PROJECTS

Audit Automation Suite • PeakEaze

- Transformed Xero/QuickBooks General Ledgers into reconciled Trial Balances, processing 1,00,000+ rows via in-memory HashMaps to bypass Sheets API rate limits.
- Built a RegEx Audit Engine to flag duplicates and misclassified expenses; automated Excel-to-Sheets conversion via Drive API.

Google Workspace Marketplace Add-ons • Cloudfort

- Co-developed [AI Assist for Gemini](#) (Sheets/Forms/Docs) — built core automation logic and contextual AI suggestion features.
- Collaborated in [Smart Form Publisher](#) -- implemented dynamic Form-to-Document data mapping and improved production stability.

SKILLS

Frontend: Next.js, TypeScript, Redux Toolkit, JavaScript (ES6+), React.js, HTML5, CSS3, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, RESTful APIs, MongoDB, Firestore, Authentication & Authorization (JWT, OAuth 2.0)

Automation: Google Apps Script, Sheets, Drive, Gmail & Forms APIs, Web Apps, Add-Ons, Zapier Integration, Make.com

Cloud & DevOps: Docker, CI/CD Pipelines, Google Cloud Platform, Domain & DNS Management
